

INNOVATIVE CONTRACTOR SOLUTIONS

# ePRO360

## Easily manage your electrical contracting business

ePRO360 is designed by contractors for contractors to improve the overall material management process of your business. Ease of use and simplicity is built into every aspect of the solution - *we believe it's the best software for busy contractors managing multiple complex projects.*

# DASHBOARD

Key business information at  
your fingertips 24/7

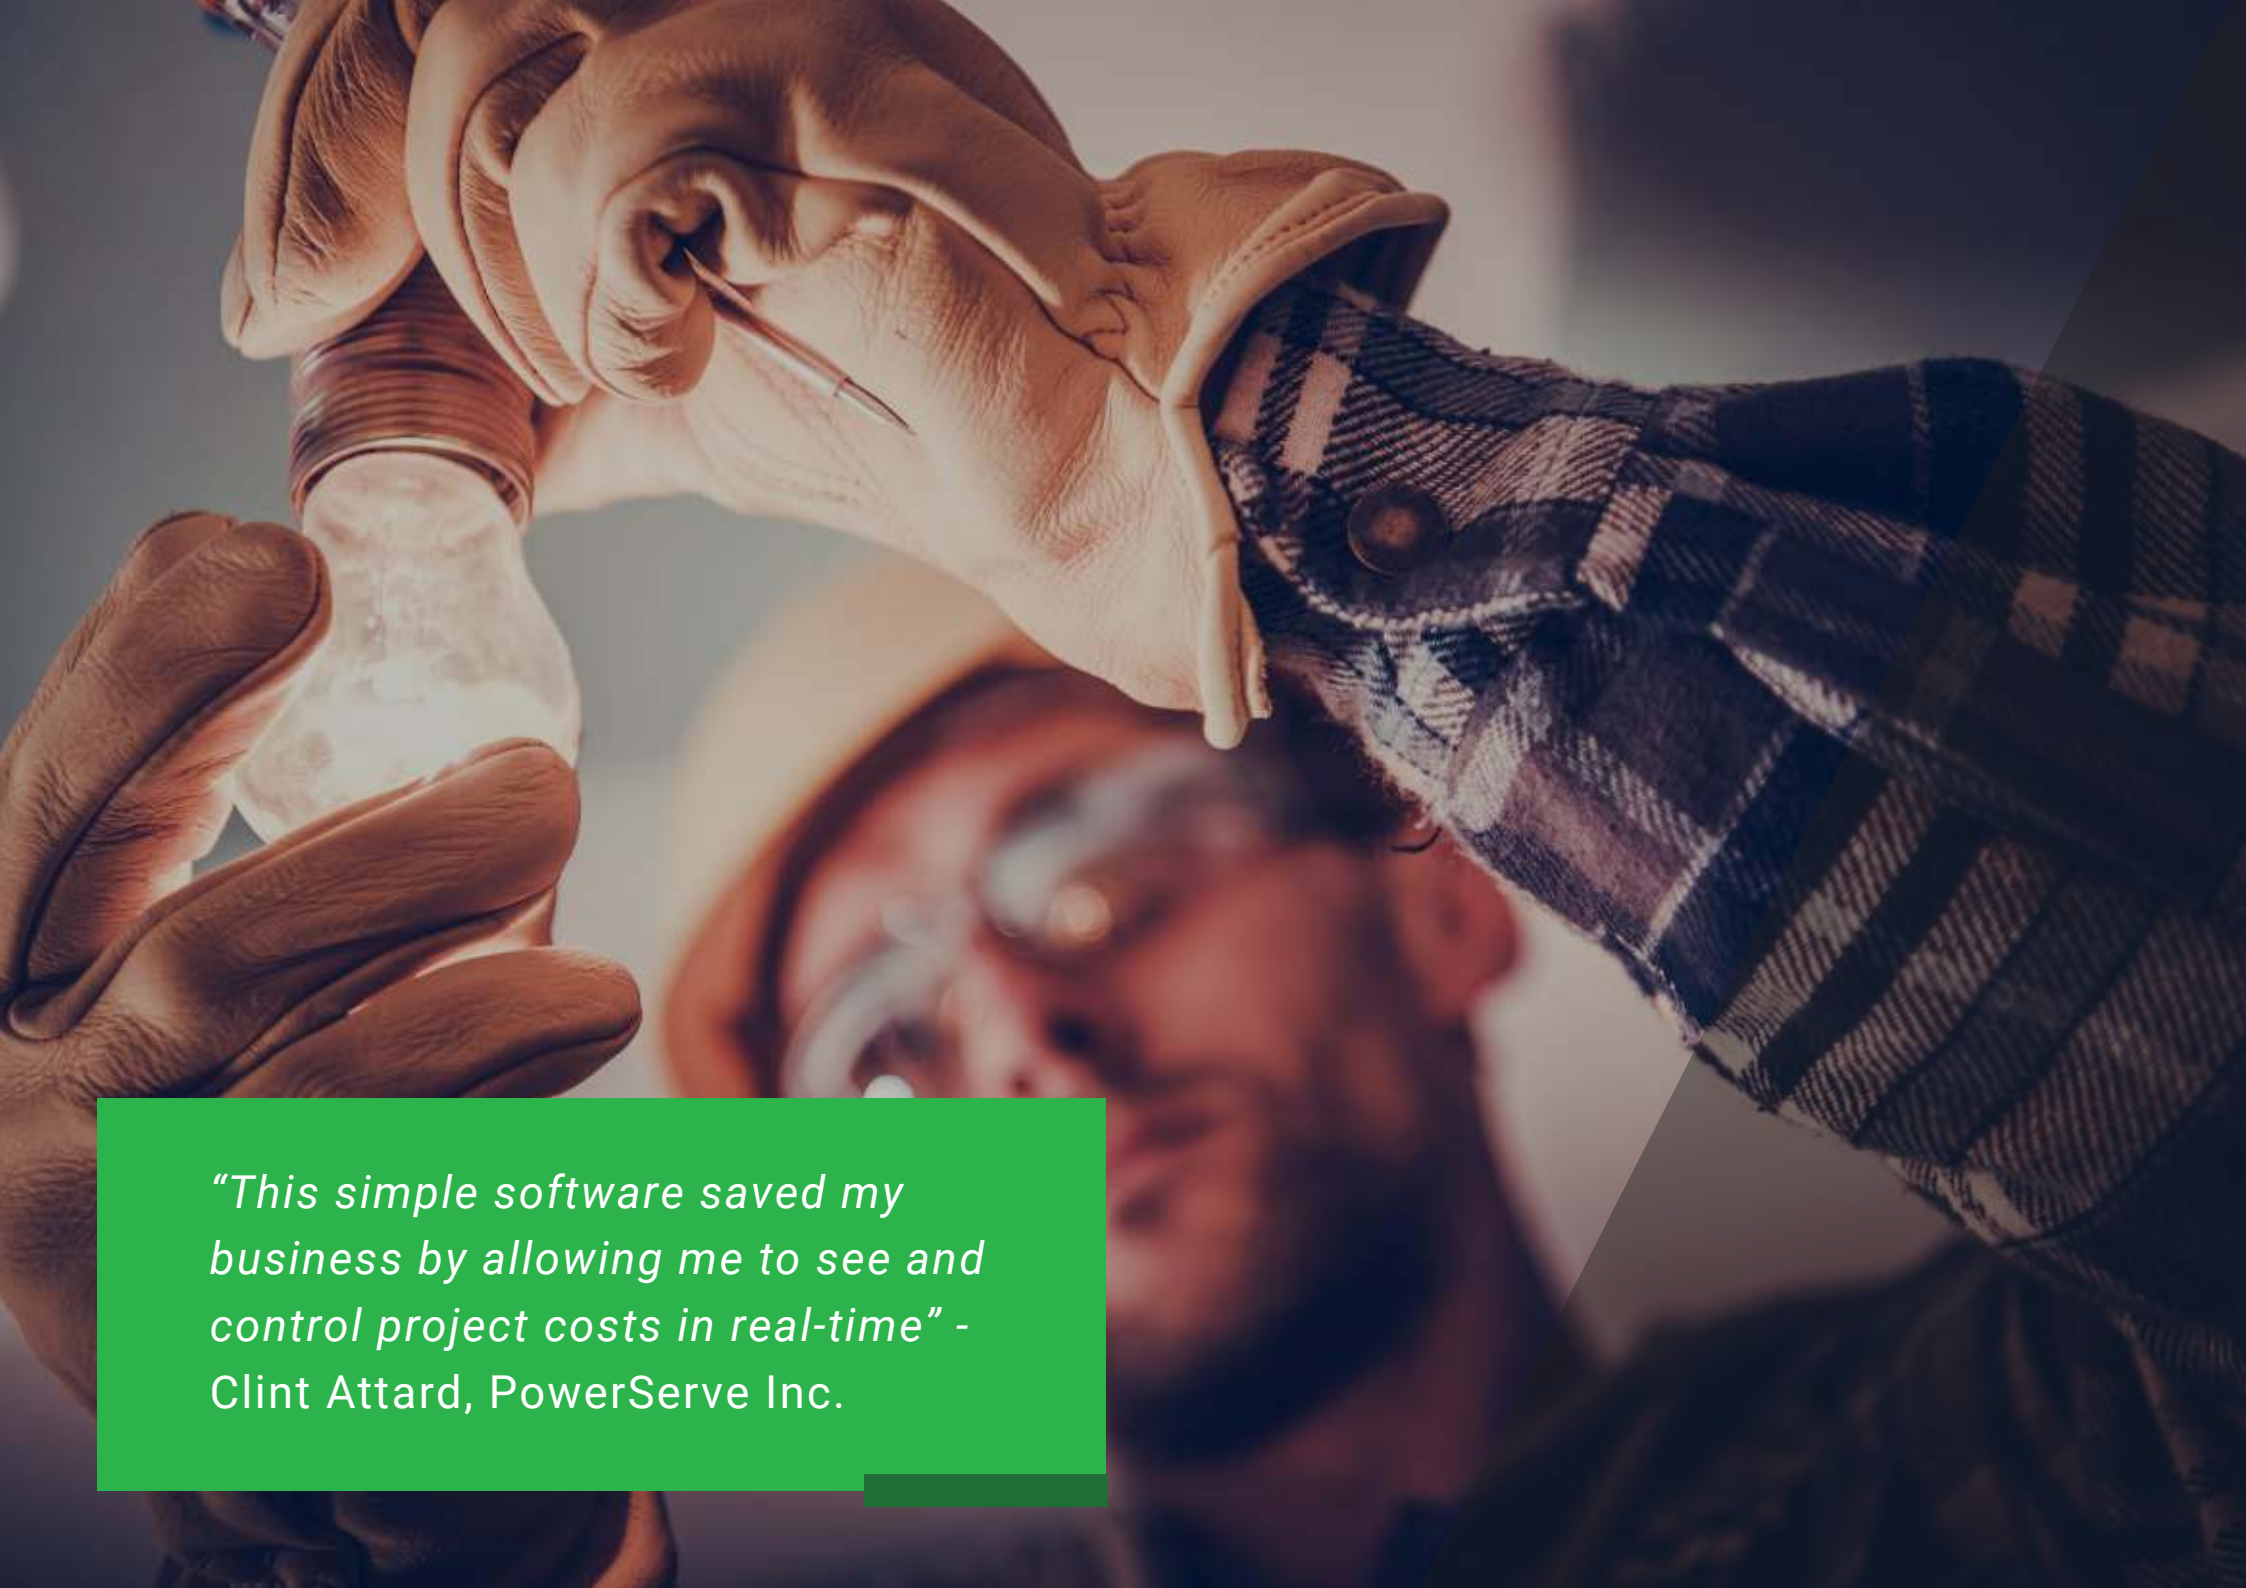

# ACCOUNTS PAYABLE

---

Electronic invoice details  
with built-in intelligence that  
reconciles statements and  
verifies all data.

NO MORE  
PAPER

A close-up photograph of a person wearing a plaid shirt, safety glasses, and gloves. They are using a pen to mark a glowing light bulb. The background is blurred, showing the person's face and safety glasses.

*"This simple software saved my business by allowing me to see and control project costs in real-time" - Clint Attard, PowerServe Inc.*

A photograph of two men standing on a construction site. The man on the left is wearing a yellow hard hat, a light blue shirt, a yellow safety vest, and yellow earplugs. The man on the right is wearing a white hard hat and a dark suit. They are both looking at a tablet held by the man in the suit. The background shows a large, light-colored concrete structure with a grid of shadows. A large green triangle is overlaid on the left side of the image, containing the text 'PURCHASE ORDERS'.

# PURCHASE ORDERS

---

Digitized packing slip processing  
to streamline PO receiving and  
processing - effortless & quick.

A woman with long brown hair tied back, wearing a white t-shirt and grey overalls with a red strap, is crouching on a wooden floor. She is holding a digital multimeter in her right hand and its red probe in her left hand, testing a wall outlet. A yellow and black tool belt is attached to her overalls. In the background, there is a kitchen area with a stove and some items on a shelf. A large green triangle is overlaid on the right side of the image, containing the title and subtitle.

# JOB COSTING

Digital tracking and estimating of labour costs, with real-time reports on estimated vs. actual costs.

# INTELLIGENCE

ePRO360 is driven by intelligence that simplifies your business while ensuring everything balances.

# MULTIPLE MODULES

The ePRO360 software suite  
comprises multiple intelligent  
modules that help digitize  
and streamline electrical  
contracting businesses

# CASE STUDY

## STURDY POWER

### Remote Control: The Digital Age of Electrical Contracting

A New Way of Managing Jobs and Empowering Teams Embracing technology to streamline business operations is key to gaining and maintaining a competitive edge in today's environment. Cloud software tools are allowing companies to remotely control and manage their projects. This is empowering their teams to ensure jobs are moving along successfully and within budget.

The advantage of using cloud software is that it allows you and your team to access the data needed at anytime from anywhere. This includes the invoice details of products ordered for a job, the quantities of items used and the cost of the materials.

Having access to this data remotely allows you to ensure client billings are executed on time and accurately to keep cash flowing.

### Invoice Digitization

One of the first places to start is with invoice digitization. The digitization of an invoice unlocks the information within the invoice so it can be used in many ways to support every area of your business.

### What is a digital invoice?

Any PDF copy of an invoice can be transformed into a digital invoice. The digitization process extracts the relevant data from these invoices such as the purchase order number, job number, item description, quantity, price and cost. Once an invoice is digitized, the data can be easily downloaded into excel, searched by keywords and uploaded into other applications.

Sturdy Power is a recognized electrical services contractor in central Ontario for over 25 years.

## Utilizing Digital Invoices in Estimating and Client Billing

Glenn Sturdy of Sturdy Power is benefiting from the digitization of his invoices for estimating and client billing.

Glenn used to flip through stacks of printed supplier invoices to find how much he paid for his material. He would need this information so he can update client costs in order to issue their bill with the right pricing. But now with his invoices digitized, Glenn uses ePRO360 to search by job number and find all his material purchased in an easy to read format that can be downloaded and added to his client's bill!

Glenn also used to flip through his paper invoices in order to update his estimating prices with the latest costs, but trying to find the products he was looking for on paper was like trying to find a needle in a haystack. It was not uncommon for items that had significant price increases or decreases such as a wire to get missed in error.

With ePRO360, Glenn uses the search functions to find all the times he was charged for a product. For example, he can search by keywords such as 'teck' or 'RW90' and ePRO360 returns every invoice that contained this product across all his suppliers and the price he was charged. Glenn takes the price that would be the most accurate to use in his estimate to ensure profitability and secure the job.

ePRO360 has given Glenn and Sturdy Power quicker visibility into pricing with more details which helps him make better decisions when estimating jobs and protecting his profits when billing clients.

*Digitize & simplify your electrical  
contracting business.*
